Patient 006:

27 yo female with history of concussion after striking her head on a steel beam at work. There was no loss of consciousness, but the patient had headache, nausea, and light sensitivity within hours. Patient was treated one week after the injury.

<i>Before Treatment</i>		SPECT Scan
Headache	✓	ND
Hyperarousal		
Sleep disturbance	✓	
Memory Problems		
Cognitive Problems	✓	
Balance Problems		
Depression		
Anxiety		
Suicidal Ideation		
Irritability	✓	

Patient received 5 treatments with Multi-Watt Infrared Laser over approximately 2 weeks.

After treatment, the patient reported marked subjective improvement. “That is sooo cool! I slept better after the first treatment and my symptoms are all gone.”

<i>After Treatment</i>		SPECT Scan
Headache		ND
Hyperarousal		
Sleep disturbance		
Memory Problems		
Cognitive Problems		
Balance Problems
